

## **Title of research project**

A qualitative assessment of transition experiences from different perspectives: individuals with a neurological condition, significant others and Health and Social Care professionals

University of Dundee School Research Ethics Committee Approval Number: E2020-144

---

Dear E

We are looking for individuals (18 years and older) with a neurological condition to take part in a research project being funded by the Scottish Government. The purpose of the research project is to gather information from individuals with a neurological condition about their lived experiences of transitions. This could include moving from Children to Adult Services or Secondary to Further/ Higher Education or employment or socialising or relationships. Talking to you will help us to get a better understanding of how transition processes work and the types of experiences that individuals' have.

Participation in the research project is entirely voluntary and involves answering 6-8 questions about your experiences of transition. This should take no more than one hour. The interviews will be audio recorded and the information collected will be used to help the research team get a better understanding of how individuals are experiencing/have experienced transitions (life and health and social care transitions).

Before you decide whether you would like to participate in the project it is important that you read the information provided in the attached participant information sheet.

If you have any questions about the project or would like to talk to someone before taking part please email [jennypreston@aapct.scot.nhs.uk](mailto:jennypreston@aapct.scot.nhs.uk)

Yours Sincerely
